GINZA

Ginza MF-67221N

Amo con curvatura stretta, di filo medio sottile, gambo lungo e dritto, micro ardiglione con punta affilata chimicamente, amo estremamente affilato adatto per tutti i tipi di pesca, acque interne e mare.

Medium to fine wire, long-shank straight hook with narrow gape and chemically-sharpened micro-barb. Ultra sharp hook designed to cover all styles of fresh and saltwater fishing.

CODE	HOOK SIZE (n°)	QTY/BAG
A1000550	4 - 20	20

BEAK STAINLESS STEEL RINGED Ginza MF-2146SS

Amo in acciaio inox forgiato con anello reclinato all'indietro, speciale curvatura tonda antislammatura, punta rientrante ad elevata penetrazione affilata chimicamente con ardiglione ad altissima tenuta. Ideale per la pesca in mare, le misure grandi sono ideali per la cattura di grossi granchi o per la traina con esche vive. Le misure sono eccezionali per la pesca light drifting o bolentino di profondità.

Forged stainless steel hook with back-turned eye, special anti-eject round bend, chemically-sharpened in-turned point and micro-barb for superb penetration and excellent hook hold. Ideal for sea fishing. Larger sizes are perfect for fishing big crabs and for troll fishing with livebait. All sizes are ideally suited to light drifting and bottom fishing from boat.

Ginza MF-67187N

Amo a gambo lungo con curvatura tonda, microardiglione con punta affilata chimicamente. Ottimo il suo impiego sia in mare che in acque dolci. Il gambo lungo impedisce a pesci muniti di robusta dentatura di tagliare il filo del terminale.

Long-shank hook with round bend and chemically-sharpened micro-barb. Ideal for both fresh and saltwater fishing. The long shank prevents sharp-toothed fish from cutting the hooklength.

CODE	HOOK SIZE (n°)	QTY/BAG
A1000480	1/0 - 12	20

Ginza MF-6770CH

Amo nero cromato, forgiato, con anello dritto, a gambo medio lungo, speciale curvatura tonda antislamatura, punta dritta ad elevata penetrazione affilata chimicamente con ardiglione ad altissima tenuta. Ideale per la pesca in mare e per il carpfishing.

Forged hook with straight eye, medium to long shank, special anti-eject round bend, chemically-sharpened straight point and micro-barb for superb penetration and excellent hook hold. Ideal for carp and sea fishing. Black chrome finish.

CODE	HOOK SIZE (n°)	QTY/BAG
A1000595	4/0 - 3	10

GINZA

FLATTED & RINGED

Ginza MF-901G

Amo dorato a gambo medio, curvatura larga, dotato di micro ardiglione ad alta tenuta e punta affilata chimicamente ad alta penetrazione. Ideale per la pesca di ciprinidi in genere.

Medium-shank, wide-gape hook with chemically-sharpened point and micro-barb for superb penetration and excellent hook hold. Ideal for targeting cyprinids. Gold finish.

FUDO SUPREMACY IN HOOK QUALITY
HOOKS

SIMPLE IS BEAUTIFUL

FUDO HOOKS. JAPANESE TECHNOLOGICAL PERFECTION

 Fudo Hooks are the perfect quality hooks made in Japan with optimum composing of the best materials, the best technology and the highest skills.

The main characteristics of Fudo Hooks are: 1. Optimal shape - from a view point of the highest catch ability 2. Extreme sharpness, which is kept when fishing 3. Great elasticity that allow them to resist deformation 4. Total corrosion resistance production process takes an advantage of several patents in field of metallurgy and production technique. Special selected material - carbon steel of controlled carbon content - is used in Fudo Hooks production. Than material, in form of calibrated wires, is prepared for Fudo engineering exclusively. There are two different sharpening method used: mechanical and chemical. During sharpening, the level of sharpness is controlled on-line what finally brings an ideal repeatability of hook point. Hardening is realized in insulated ovens where the system of computer assistance controlling the temperature with accuracy of 0.01 degree of centigrade, and the time of treating is adjusted with accuracy of 0.001 second. In result, Fudo Hooks are perfectly hardened and achieve excellent power and elasticity. All model of Fudo Hooks have "Build-in" corrosion resistance.

FUDO DELTA FAMILY

 Modern hooks with especially designed, completely new, shape of point. Special gouge at the flat keeps fishing line in right space. Profile of new point has triangle shape with edges and elongated point so now it looks like ending of harpoon tooth.

TRUST GRIP

Accurate and fine laser carving on the end to prevent from the line come-off, trust cutting to restrain the line-moving, you can devote to your great fishing without any worry of knot between hooks and lines.

TRIPLE EDGE POINT

We adopted our new technical process named "Triple Edge Point" on all FUDO DELTA HOOK series. Cutting the needle point by three different degree, equipped with anti-corrosion and anti-bending in high level, it will show the excellent hook stick.

Ami Vertical GK501

■ Serie di ami in acciaio ad alta percentuale di carbonio appositamente studiati dai migliori esperti del settore per la pesca al vertical jigging; viene applicato alla testa di esche artificiali ed è dotato di speciale cappio in multifibre protetto da una speciale guaina termoretraibile che ne preserva l'integrità.

■ Range of hooks specially designed for vertical jig fishing by the best specialists in the sector. Made from high carbon content steel, this hook features a loop covered with a shrink tube for maximum protection. It is designed to be attached to the lure head finish.

Speciale Mazzetta

■ Amo nero cromato, forgiato, con anello dritto, a gambo medio lungo, speciale curvatura tonda antislamatura, punta dritta ad elevata penetrazione affilata chimicamente con ardiglione ad altissima tenuta. Ideale per la pesca in mare e per il carp fishing.

■ Forged hook with straight eye, medium to long shank, special anti-eject round bend, chemically-sharpened straight point and micro-barb for superb penetration and excellent hook hold. Ideal for carp and sea fishing. Black chrome finish.
